Property size: @ 1 acre

2003: Moved here

2006:

- 1st year for butterfly & hummingbird garden.
- Tackled BAMBOO -- Hired landscaping firm who dug it out, needing bigger and bigger equipment to finally get the job done -- in the end needing their "Bamboo Exterminator" equipment. Since then keep a vigilant eye out for new plants -- paint emerging stalks with Round Up)

2007: NEW Milkweed Garden; began with 1 plant

2008:

- Milkweed Garden now has dozens of plants
- Neighbors began tackling their Bamboo patch (using herbicide)
- Planted MEADOW left of path where BAMBOO had been. Planted "Tallgrass Prairie" mix from Prairie Moon Nursery (nursery explained that the meadow would get better and better each year as new plants came into their own / began to show up from seeds in the original mix).

Tallgrass Prairie

for MESIC Soils

Dramatic site changes by heavy equipment during construction or landscaping can remove topsoil and organic matter, leaving exposed clay. The tough species in this mix can grow well in these harsh conditions.
